

Jenni Lawson

Dr. Knudson

CSC-450

5/29/19

### Final Project Write-Up

#### Sources:

- 1) All images I gathered were from Unsplash, aside from those linked to the instagram page, which are my own.
- 2) I received some help in class from Dr. Knudson and various friends, including Zach, Anna, and Isabella.
- 3) The fonts I used were taken from Google Fonts <https://fonts.google.com/>
- 4) I learned how to embed instagram posts into my html from instagram's website and easy-to-use post embedding tool: <https://www.instagram.com/developer/embedding/>
- 5) I got help creating a text outline from this website [https://wpshout.com/quick-guides/create-text-outline-css/\\*/](https://wpshout.com/quick-guides/create-text-outline-css/*/)
- 6) I used W3schools tutorials for help on coding many aspects of my website, including
  - a) Parallax scrolling [https://www.w3schools.com/howto/howto\\_css\\_parallax.asp](https://www.w3schools.com/howto/howto_css_parallax.asp)
  - b) Creating forms [https://www.w3schools.com/html/html\\_forms.asp](https://www.w3schools.com/html/html_forms.asp)
- 7) The *Javascript & JQuery* book we have been using in class was also a great source of inspiration. I drew from the various sections we were assigned as reading in some elements of my JavaScript. It especially helped me format my "favorites" tool.
- 8) Of course, our labs and assignments from class were also a great help, mostly in coding my JavaScript.
- 9) I also read through these sources <http://jqfundamentals.com/chapter/jquery-basics> , <https://stackoverflow.com/questions/1065925/jquery-selecting-by-class-and-input-type> to refresh my memory on some JQuery topics.
